Part V. End-to-End System Process 20

Part I. Project Overview

Background, problem, objectives, scope, and significance of the study

Introduction

Combat sports are widely practiced in Cavite, including boxing, Brazilian jiu-jitsu, judo, karate, kickboxing, mixed martial arts (MMA), Muay Thai, taekwondo, and wrestling. These disciplines promote physical fitness, athlete development, and competitive participation. As the number of athletes and training programs grows, efficient management of operations and training activities becomes increasingly important.

Many training centers in Cavite still rely on manual processes to manage member registration, training schedules, attendance, performance records, payments, and employee payroll. These methods can result in inaccurate records, scheduling conflicts, payroll errors, and delays in decision-making. Without an integrated platform, administrators and coaches find it difficult to monitor athlete progress and manage training programs effectively.

This study proposes a web-based integrated management platform with a decision support system and a training management system to streamline operations, improve training management, and support data-driven decisions for combat sports training centers in Cavite.

Project Context

The platform addresses inefficient scheduling, difficulty in tracking athlete performance, and the lack of centralized communication among owners, administrators, coaches, staff, and athletes. It is built around three main components:

Component	What it does
Training and Scheduling Management System	Lets authorized coaches and staff create and manage athlete training schedules. When a user enters the date, time, facility, and type of session, the system checks for schedule and resource conflicts to prevent overlapping sessions and give athletes accurate, timely schedules.
Decision Support System (DSS)	Analyzes attendance records, membership activity, revenue trends, and financial forecasts, and generates summaries and analytical reports that help owners evaluate performance and improve the center.
Mobile Application (Median.co container)	Wraps the responsive web application; it is not a separately developed native app. Athletes can apply for membership, view schedules, record or confirm attendance, book sessions, and receive real-time updates.

Statement of the Problem

Combat sports training centers, particularly their owners and administrators, face operational challenges because many lack an integrated management system. Manual handling of athlete records, schedules, attendance, payments, payroll, and administrative tasks can lead to inaccurate or duplicated data, scheduling conflicts, payroll and transaction errors, limited access to information, and inefficient decision-making. Specifically, this study seeks to answer:

1. How can a web-based integrated management platform be implemented and designed to improve the operational processes of combat sports training centers in Cavite?
2. How can a combat sports training center improve the management of athletes' records, training schedules, attendance, and administrative tasks?

3. How can a decision support system help owners improve the evaluation of athlete records, performance, and training effectiveness?
4. How can a training management system enhance the efficiency of planning, monitoring, and evaluation of training programs?
5. How can a web application improve accessibility and real-time updates for athletes, coaches, and owners?

Objectives of the Study

The main objective is to design, implement, and evaluate a web-based integrated management platform for combat sports training centers in Cavite that integrates a decision support system, a training management system, and a mobile application to improve operational efficiency, data accuracy, scheduling, attendance monitoring, communication, and access to services. Specifically, it aims to:

1. Design and implement a web-based system that centralizes athlete, coach, and training data.
2. Implement a training management module for training schedules, attendance tracking, and session creation.
3. Implement a decision support system that analyzes data for better training center evaluation.
4. Create a web application that gives athletes and coaches real-time access to schedules and notifications.
5. Evaluate the system's effectiveness in improving data accuracy, communication, and management efficiency.

Scope and Limitations

The study covers the design and implementation of the platform for selected combat sports training centers in Cavite. The functions in scope are organized into the seven modules described in Part IV.

Exclusions and limitations

- Limited to selected combat sports training centers in Cavite; findings may not represent all combat sports facilities in the Philippines.
- Advanced biometric analysis and integration with wearable devices are excluded.
- Full accounting, taxation, and statutory financial reporting are excluded. Finance Management is limited to operational income and expense recording, payment transactions, receivables, payables, payroll records and disbursements, budgets, and management summaries.
- Most in-person payments continue to be processed at the front desk; the system records the payment or transaction details.
- The mobile app is a Median.co container of the responsive web app, not a separately developed native app.

Significance of the Study

Beneficiary	Expected benefit
Training Center Owners	Improved operational efficiency, less manual work, organized and accurate records, and reports and analytics that support management decisions.
Athletes and Customers	Easier access to schedules, session bookings, membership information, attendance records, and timely notifications through the web app and its mobile container.
Coaches and Staff	Help managing schedules, monitoring attendance, processing session requests, and communicating updates, with access limited to the modules their role permits.
Future Researchers	A reference for research on sports management systems, decision support systems, role-based access control, responsive web development, and mobile web containers.

Part II. Panelists' Feedback and Revisions

Each comment from the panel, the revision made, and where to find it in this document

The panel's comments have been worked into the modules they affect. Each revised section is marked with a highlighted **Panelists' Feedback Addressed** box so reviewers can trace every change.

#	Panelists' feedback	Revision made	Where addressed
PF-1	Exact document to be submitted to the Platform Administrator	Listed the specific documents for each verification tier, what each one proves, who must submit it, and the upload rules, plus the Admin's review checklist.	Module 2, Sections 2.2 to 2.3
PF-2	Services: add pictures to the services	Every service listing now requires a cover photo and supports a gallery of up to 5 images.	Module 2, Section 2.5
PF-3	Membership fee is inclusive	Membership plans show one all-inclusive fee with an itemized list of what the fee covers. Anything not included is labeled as an add-on with its own price.	Module 2, Section 2.6
PF-4	Proper descriptions of services	Defined required description fields for every service (overview, discipline, level, duration, inclusions, requirements, what to bring, price).	Module 2, Section 2.5
PF-5	Check the availability of the trainer before booking	Added coach availability calendars. Booking is validated against the coach's schedule, leave, and existing sessions, and only open slots are shown.	Module 3, Section 3.3
PF-6	Information about the session or training	Added a Session Details page showing coach, schedule, venue, level, capacity and remaining slots, requirements, and fee before booking.	Module 3, Section 3.4
PF-7	Integrated Management (Training Scheduling System, Income / Sustainability, Process of the Business Side)	Grouped the business-side processes into one Integrated Business Management module, linked to Training Management and to DSS income and sustainability indicators.	Modules 3, 5, and 7

Panel's recommended module structure

The panel framed the platform for Contact Sports Training Centers around five areas. Each one maps to the modules in this document as follows:

Panel's area	Module(s) in this document
Monitoring of the Athletes	Module 4: Athlete Monitoring and Membership
User Management	Module 1: User Management and Access Control
Training Management	Module 3: Training Management (scheduling, booking, attendance)
Training Center	Module 2: Training Center Management (registration, verification, services, plans); Module 5: Integrated Business Management; Module 6: Communication and Notifications
DSS	Module 7: Decision Support System

Part III. User Roles and Access Levels

Who uses the platform and what each role is allowed to do

Role	Description and access
Platform Administrator	Manages the overall platform, reviews training center applications and verification documents, approves or rejects applications, assigns verification status, and monitors platform-level activities.
Platform User	A registered user who can browse training centers, view information and services, manage a personal account, and apply for membership or center ownership.
Training Center Owner	A verified platform user who manages a registered center: its employees, services, schedules, memberships, records, and permitted operational modules.
Training Center Employee (incl. Coaches)	A platform user assigned by a verified owner to perform authorized duties. Can access only the modules, records, and functions permitted by the assigned role.
Athlete / Member	A platform user whose membership in a center has been approved. Can book sessions, check in, view schedules, and see personal attendance and progress records.

Access matrix (summary)

Module	Platform Admin	Owner	Employee / Coach	Athlete	Platform User
1. User Management	Full	Center users	Own profile	Own profile	Own profile
2. Training Center Mgmt.	Review / approve	Full	Limited	View	Browse
3. Training Management	-	Full	By role	Book / view	View public
4. Athlete Monitoring	-	Full	By role	Own records	-
5. Business Management	-	Full	By role	Own payments	-
6. Communication	Platform notices	Full	By role	Receive	Receive
7. Decision Support	Platform-level	Full	If permitted	-	-

"By role" means access is granted per module by the owner through role-based access control. Each center's records are kept separate from other centers'.

Part IV. System Modules

Module-by-module specification of features

The platform runs every module inside each registered training center. Each approved center has its own profile, disciplines, services, memberships, schedules, athlete and employee records, customer interactions, finances, inventory, procurement, communications, and reports. Authorized users can access only the center and functions assigned to their roles.

Module	Covers
1. User Management and Access Control	Registration, login, OTP verification, profiles, roles, permissions
2. Training Center Management	Owner application, verification tiers, admin review, workspace, services, membership plans
3. Training Management	Classes, scheduling, conflict checks, coach availability, session details, booking, attendance
4. Athlete Monitoring and Membership	Membership application, athlete profiles, progress, rank, competition records
5. Integrated Business Management	HR and payroll, finance (income and sustainability), CRM, inventory, procurement
6. Communication, Notifications and Mobile Access	Announcements, automated alerts, Median.co mobile container
7. Decision Support System	Dashboards, reports, trend analysis, forecasting, sustainability indicators

MODULE 1

User Management and Access Control

Purpose	Create and secure user accounts, verify identities, and control what each user can see and do.
Primary users	All users; Platform Administrator; Training Center Owner

1.1 Account Registration and Authentication

- New users create an account by providing required personal and login information.
- Existing users log in securely with their registered credentials.
- Users manage their own profiles and can recover a forgotten password.

1.2 Email and OTP Verification

- After registration, the system sends a one-time password (OTP) to the user's registered email address.
- The user enters the valid OTP to verify and activate the account before accessing protected functions.

1.3 User Onboarding and Training Center Discovery

- After verification, users are directed to the platform home page.
- Registered centers can be searched and filtered by location, combat sports discipline, services, schedules, verification status, and other relevant information.

1.4 Role Assignment and Role-Based Access Control (RBAC)

- Supports the roles listed in Part III: Platform Administrator, Platform User, Training Center Owner, Training Center Employee (including coaches), and Athlete/Member.
- Owners assign roles and permissions to employees per module; each employee can access only the records and actions their role allows.
- Center data is isolated: users of one center cannot see another center's records.

MODULE 2

Training Center Management

Purpose	Register and verify training centers, set up each center's workspace, and publish its services and membership plans.
Primary users	Training Center Owner (applicant); Platform Administrator; Platform Users (browsing)

2.1 Training Center Owner Application

A verified platform user may apply to become a Training Center Owner and register a center by submitting the center profile, address, geographic location, contact details, operating hours, offered combat sports disciplines, services, facilities, and other required information.

2.2 Verification Tiers and Exact Documents to Submit

The applicant selects a verification tier and uploads the required documents. The system records the application status and lets the applicant review what has been submitted. Tier 2 includes all Tier 1 documents plus physical and ownership proof.

PANELISTS' FEEDBACK ADDRESSED: PF-1, exact documents to submit to the Platform Administrator

• The documents below are the exact items the Platform Administrator will look for. Missing or unreadable items cause the application to be returned for correction.

Tier 1: Government and Business Documents

#	Document	What it proves / acceptable proof	Who submits
1	DTI Certificate of Business Name Registration	Business name is registered with the Department of Trade and Industry.	Sole proprietorships
2	SEC Certificate of Registration / Incorporation	Business is registered with the Securities and Exchange Commission.	Corporations and partnerships
3	Mayor's / Business Permit (current year)	The center is allowed to operate by the city or municipality.	All applicants
4	Barangay Business Clearance / Permit	Clearance from the barangay where the center is located.	All applicants

Submit either No. 1 (DTI) or No. 2 (SEC), whichever applies, together with Nos. 3 and 4.

Tier 2: Physical and Ownership Verification (in addition to Tier 1)

#	Document	What it proves / acceptable proof	Who submits
5	Facility photo gallery (at least 10 photos)	The facility exists and is equipped: entrance and signage, training floor, mats or ring, equipment, locker or shower area.	Tier 2 applicants
6	Video tour of the facility	A continuous walk-through showing the actual training areas.	Tier 2 applicants
7	Valid owner identification document	A valid, unexpired government-issued ID of the owner.	Tier 2 applicants
8	Owner selfie	The owner's live photo, used to match against the submitted ID.	Tier 2 applicants
9	Proof of address	A recent electricity or water bill showing the center's address.	Tier 2 applicants

Upload rules (proposed)

- Accepted formats: PDF, JPG, or PNG for documents and photos; MP4 for the video tour.
- Documents must be clear, complete, in color, and valid (not expired) on the date of submission.
- The name and address on the permits must match the center profile and the proof of address.

2.3 Administrative Review and Verification Decision

- The Platform Administrator reviews the center information and documents through the Admin Panel.
- Review checklist: every required document is present and readable; permits are current; the business name and address match across documents; the owner selfie matches the ID (Tier 2); photos and video match the declared facility (Tier 2).
- Decision: **Approve**, **Reject** with a stated reason, or **Return for correction** and resubmission.
- Once approved, the center becomes visible on the platform and receives the badge for its verified tier.

2.4 Center Workspace Activation

The system creates a dedicated operational workspace for the approved center. The owner configures the center's disciplines, classes, training programs, private coaching, sparring, open-mat activities, services, facilities, membership plans, operating policies, employees, customer management, finance, payroll, inventory, and procurement settings. These records are kept separate from other centers'.

2.5 Services Catalog (with pictures and proper descriptions)

PANELISTS' FEEDBACK ADDRESSED: PF-2 (pictures) and PF-4 (proper descriptions)

• Every service must have a cover photo and may include a gallery of up to 5 images (e.g., the class in action, the training area, the equipment used).

• A service cannot be published until all required description fields below are filled in.

Field	Description	Example
Service photos	Required cover photo plus optional gallery (up to 5)	Photo of the Muay Thai class on the mats
Service name	Clear, specific name	Beginner Muay Thai Group Class

Field	Description	Example
Discipline	Combat sport covered	Muay Thai
Type	Group class, private coaching, sparring, open mat, etc.	Group class
Overview	2 to 4 sentences on what the service is and what the athlete will learn	Covers stance, footwork, basic strikes, and pad work...
Skill level / eligibility	Who the service is for; age or rank requirement	Beginners, ages 15 and up
Duration and frequency	Length of each session and how often it runs	90 minutes, Mon/Wed/Fri
Inclusions	What the price covers	Coach, gloves and pads, use of showers
Requirements / what to bring	Items or documents the athlete must bring	Hand wraps, mouthguard, water
Price	Price per session or package, or 'Included in membership'	PHP 300 per session

2.6 Membership Plans (all-inclusive fee)

PANELISTS' FEEDBACK ADDRESSED: PF-3, membership fee is inclusive

• Each membership plan shows one all-inclusive fee. The plan page itemizes everything the fee covers, so members know there are no hidden charges.

• Services not covered by the plan are clearly labeled as add-ons and show their own price.

Plan detail	What is shown to the athlete
Plan name and duration	e.g., Monthly Unlimited, 3-Month Package, 10-Session Pass
All-inclusive fee	One total price, with any registration fee already included
What the fee includes	Classes and disciplines covered, number of sessions, facility access (gym, lockers, showers), equipment use, assessments or uniform if applicable
Add-ons (not included)	e.g., private coaching, competition fees, merchandise, each with its own price
Policies	Validity period, freezing or suspension rules, renewal, cancellation and refund policy

MODULE 3

Training Management

Purpose	Plan and run classes and sessions, prevent scheduling conflicts, handle bookings, and record attendance.
Primary users	Coaches and authorized employees; Owner; Athletes (booking and check-in)

3.1 Training, Class, and Session Creation

- Create classes, group sessions, private coaching, sparring sessions, open-mat activities, and other center-specific services.
- Assign the coach, facility, date, time, capacity limit, and participant eligibility for each session.
- Record training progress notes for sessions and participants.

3.2 Schedule Management and Conflict Checking

- Before a schedule is saved, the system checks for conflicting coaches, facilities, and overlapping sessions.
- Authorized users can reschedule or cancel sessions; affected athletes are notified automatically (Module 6).
- Waiting lists are managed when a session is full; a slot that opens up is offered to the next athlete in line.

3.3 Coach / Trainer Availability

PANELISTS' FEEDBACK ADDRESSED: PF-5, check the availability of the trainer before booking

• Each coach has an availability calendar showing working hours, days off, approved leave (from Module 5), and sessions already assigned.

• When an athlete books private coaching or a session, the system checks the coach's availability first and shows only open time slots. A booking that conflicts with the coach's schedule cannot be submitted.

• If a coach goes on leave or becomes unavailable, affected bookings are flagged so staff can reassign a coach or reschedule, and athletes are notified.

3.4 Session and Training Information

PANELISTS' FEEDBACK ADDRESSED: PF-6, information about the session or training

• Every session has a Session Details page that athletes see before booking.

Information shown	Details
Session / training name and type	e.g., Intermediate BJJ, Private Boxing Coaching, Open Mat
Discipline and skill level	Combat sport and the level or rank it is designed for
Coach	Assigned coach's name, photo, and short profile (experience, rank, specialization)
Date, time, and duration	Start and end time and recurrence
Venue / facility	Training area or room within the center

Information shown	Details
Capacity and remaining slots	Maximum participants and slots still available; waiting list if full
Training content	Focus of the session (e.g., guard passing, conditioning, sparring rounds)
Requirements and what to bring	Gear, attire, health or eligibility requirements
Fee	Included in membership, or the add-on price

3.5 Service Booking and Approval

- Members browse the center's available classes, services, and private sessions and submit bookings.
- The system validates slot availability, coach availability, and member eligibility (active membership, level).
- Authorized personnel approve or reject bookings when center policy requires confirmation.

3.6 Attendance and Check-In Management

- Members check in with their account or membership QR code.
- Permitted personnel may confirm or enter attendance manually when necessary.
- The system records attendance history, check-in and check-out times, late arrivals, absences, and no-shows for each center, class, or session.

MODULE 4

Athlete Monitoring and Membership

Purpose	Manage memberships and keep a centralized record of each athlete's profile, attendance, progress, and achievements.
Primary users	Owner; authorized employees and coaches; Athletes (own records)

4.1 Membership Application and Athlete Profile Creation

- A platform user applies for membership in a selected center through the web application.
- Authorized personnel approve or reject the request.
- On approval, the system creates or activates the membership and athlete profile: selected plan, service eligibility, emergency contacts, relevant health declarations, combat sports background, rank, and training history.

4.2 Membership Management

- Manage membership activation, renewal, expiration, suspension, and cancellation.
- Manage plans, packages, and member status.
- Expiring memberships trigger renewal reminders (Module 6).

4.3 Athlete Monitoring and Records

Record	What is monitored
Attendance	Session attendance, frequency, late arrivals, absences, and no-shows (from Module 3)
Training progress	Coach progress notes per session and over time
Rank / skill development	Current rank or belt, promotions, and skill assessments
Competition participation	Events joined, division, and results
Achievements	Awards, titles, and milestones
Health and safety	Health declarations and emergency contacts (access limited to authorized staff)

Athletes can view their own attendance and progress records; coaches and owners see the records of athletes in their center according to their permissions.

MODULE 5

Integrated Business Management

Purpose	Run the business side of the center (staff, payroll, income, customers, stock, and purchasing) in one place, connected to training operations.
Primary users	Owner; HR, finance, front-desk, and inventory personnel (by role)

PANELISTS' FEEDBACK ADDRESSED: PF-7, Integrated Management (Training Scheduling System, Income / Sustainability, Process of the Business Side)

• All business-side processes are grouped here and share data with Training Management: coach schedules and attendance feed payroll; bookings and memberships feed income records; session activity drives supply needs.

• Income and sustainability are tracked in 5.2 and analyzed in the Decision Support System (Module 7).

5.1 Human Resources and Payroll

- Create and maintain employee and coach profiles, employment information, roles, work assignments, schedules, attendance, leave records, and performance notes.
- Compute payroll from authorized compensation, attendance, leave, deductions, and payroll-period records.
- Maintain payroll histories, net pay, and payslip information.
- Coach schedules and leave feed the coach availability check in Module 3.

5.2 Finance Management (Income and Sustainability)

Area	Features
Income	Membership and registration fees, session and walk-in payments, private coaching, merchandise sales, and discounts
Expenses	Operational expenses, payroll disbursements, supplies, and procurement costs
Payments	Cash, card, or available e-wallet payments recorded with transaction details; payment histories
Receivables and payables	Outstanding member balances and amounts owed to suppliers
Budgets	Budget setting and budget-versus-actual comparisons
Sustainability reports	Cash-flow summaries, income versus expenses, payroll summaries, disbursement histories; analyzed further in the DSS

Excludes full accounting, taxation, and statutory financial reporting.

5.3 Customer Relationship Management (CRM)

- Record prospective and existing customer profiles, inquiries, membership leads, and follow-ups.
- Track service interactions, preferences, feedback, concerns, and engagement history.
- Supports membership conversion, service improvement, targeted announcements, and resolving customer concerns.

5.4 Inventory Management

- Maintain records of training equipment, protective gear, supplies, merchandise, and other stock items.
- Record quantities, storage locations, issuances, returns, stock adjustments, and damaged or lost items.
- Set minimum stock levels and keep an inventory movement history.

5.5 Material Requirements and Procurement

- Identify materials, supplies, and equipment that need replenishment based on minimum stock levels, scheduled activities, and approved operational needs.
- Create purchase requests and route them for approval.
- Maintain supplier information and prepare purchase orders.
- Record received items and automatically update inventory quantities.
- Monitor procurements as pending, partially received, completed, or cancelled.

MODULE 6

Communication, Notifications and Mobile Access

Purpose	Keep owners, staff, and athletes informed in real time and give mobile access to the platform.
Primary users	All users

6.1 Announcements

- Targeted announcements to all members, a specific class, or a group of customers (e.g., from CRM leads).
- Center activity and event announcements.

6.2 Automated Notifications

Trigger	Who is notified
Membership application approved or rejected	Applicant
Booking approved, rejected, or waitlisted	Athlete
Schedule change, cancellation, or coach reassignment	Booked athletes and the assigned coach
Session reminders	Booked athletes
Membership about to expire	Member
Customer follow-up due	Assigned staff
Low stock / reorder level reached	Inventory personnel and owner
Procurement status update	Requesting and approving personnel
Center verification decision	Applicant owner

6.3 Mobile Access (Median.co Container)

- The mobile app is a Median.co container of the responsive web application, not a separate native app.
- Through it, athletes can apply for membership, view schedules, book sessions, check in or confirm attendance, and receive real-time updates.

MODULE 7

Decision Support System (DSS)

Purpose	Turn the center's operational data into dashboards, reports, trends, and forecasts that help the owner make decisions.
Primary users	Owner; authorized managers; Platform Administrator (platform-level data only)

7.1 Dashboards and Reports

The DSS consolidates the center's authorized data into dashboards and reports covering:

Area	Example indicators
Attendance	Attendance rate per class, peak hours and days, no-show rate
Membership activity	New, renewed, expired, and cancelled memberships; retention rate
Athlete performance	Progress and rank promotions, competition results, training effectiveness
Service usage	Most and least booked services, class fill rate, coach utilization
Customer engagement	Leads, conversion rate, feedback and concerns
Employees	Attendance, workload, and payroll summary
Finance and revenue	Revenue by service, income versus expenses, outstanding balances
Inventory and procurement	Stock levels, items below reorder level, procurement status

7.2 Trend Analysis and Forecasting

- Attendance, membership, and revenue trend analysis.
- Financial forecasting to support resource planning.
- Identification of operational issues (e.g., declining attendance in a class, low-utilization time slots).

7.3 Income and Sustainability Indicators

PANELISTS' FEEDBACK ADDRESSED: PF-7, Income / Sustainability

• The DSS gives the owner a sustainability view of the business, built from Finance, Membership, and Training data.

- Monthly income versus expenses and net income trend.
- Revenue mix: share of income from memberships, sessions, private coaching, and merchandise.
- Member retention and renewal rate, as a measure of recurring income.
- Class and facility utilization, showing which schedules are profitable and which are underused.
- Budget-versus-actual comparison and cash-flow forecast.

7.4 Platform-Level Monitoring

Platform Administrators may monitor only the information permitted for overall platform administration (e.g., number of registered and verified centers, pending applications). They do not see a center's private operational records.

Part V. End-to-End System Process

The 19-step process from the original features list, mapped to its module

Step	Process	Module	Phase
1	Account Registration and Authentication	M1	Access
2	Email and OTP Verification	M1	Access
3	User Onboarding and Training Center Discovery	M1	Access
4	Training Center Owner Application	M2	Center setup
5	Verification Tier Selection and Submission	M2	Center setup
6	Administrative Review and Verification Decision	M2	Center setup
7	Center Workspace Activation and Combat Sports Process Integration	M2	Center setup
8	Human Resources Management and Role-Based Access	M5, M1	Operations
9	Membership Application and Athlete Profile Creation	M4	Operations
10	Membership and Athlete Record Management	M4	Operations
11	Customer Relationship Management	M5	Operations
12	Training, Class, and Schedule Management	M3	Operations
13	Service Booking and Approval	M3	Operations
14	Attendance and Check-In Management	M3	Operations
15	Finance Management	M5	Operations
16	Inventory Management	M5	Operations
17	Material Requirements and Procurement Management	M5	Operations
18	Communication, Notifications, and Mobile Access	M6	Communication
19	Decision Support, Reporting, and Continuous Monitoring	M7	Evaluation

Process flow summary

Access (M1) → a user registers, verifies by OTP, and discovers centers. **Center setup (M2)** → an owner applies, submits the tier documents, is approved by the Platform Administrator, and configures the workspace, services, and plans. **Operations (M3 to M5)** → staff and coaches are onboarded with role-based access, athletes become members, sessions are scheduled against coach availability, bookings and attendance are recorded, and the business side (payroll, finance, CRM, inventory, procurement) runs alongside. **Communication (M6)** → everyone is kept updated through notifications and the mobile container. **Evaluation (M7)** → the DSS turns all of this into reports, trends, and forecasts for continuous improvement.
